EXPERIENCE

H&M Group

Software Developer

📅 June 2025 – Present 📍 Location

GenAI Enablement & Intelligent Platforms

- Delivered and enhanced the **Fabric Costing Tool (FCT)**, a mission-critical enterprise platform processing **1,200–1,500+ daily requests**, improving the efficiency, reliability, and consistency of fabric cost estimation for global sourcing teams.
- Engineered the **LEA UI** using Angular, TypeScript, Node.js, REST APIs, and **micro-frontend architecture**, enabling modular development, independent deployments, and improved maintainability across enterprise applications.
- Architected and developed **AskLEA**, an enterprise GenAI assistant leveraging **LLMs, AI Agents, Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP), function calling, and tool orchestration** to provide conversational access to enterprise knowledge, business workflows, and intelligent decision support.
- Architected a dynamic **LLM-driven multi-agent orchestration framework**, replacing rigid intent-based routing with intelligent tool selection and autonomous execution of multi-step workflows across multiple enterprise systems.
- Designed AI-powered backend services for **document intelligence, semantic search, enterprise knowledge retrieval, and structured data extraction**, integrating OCR, embeddings, vector search, REST APIs, and RAG pipelines to power scalable GenAI applications.
- Developed the **Bottom-Up Supplier Recommendation Solution**, leveraging historical sourcing data, business constraints, and AI-driven ranking algorithms to generate explainable supplier recommendations with confidence scoring and decision support.
- Designed reusable backend services, enterprise APIs, and intelligent data pipelines, enabling seamless integration across internal platforms while reducing manual effort through workflow automation.
- Drove cross-functional collaboration with product managers, business stakeholders, and engineering teams to define solution architecture, API contracts, data models, AI workflows, and production-ready enterprise applications.

Cognizant Technology Solutions

Full Stack Developer

📅 Feb 2022 – May 2025 📍 Bangalore, India

- Contributed to the redevelopment of **OneC 3.0**, Cognizant's enterprise management platform, as part of a **20-member team**, using **Angular 17 (micro-frontend, module federation), Node.js, .NET Web APIs, MongoDB, and Azure**.
- Built scalable, responsive UI using **Bootstrap** and Angular, supporting core modules such as attendance, payroll, leave management, and project administration.
- Optimized the platform to support **200K+ daily active users** and handle **100M+ monthly read requests**, improving performance and reliability at scale.
- Developed the frontend for a **Telecommunications Certification Body (TCB)** platform using **Angular** and **Material UI**, delivering **40+ features** and resolving **70+ defects** with high quality standards.

EDUCATION

B.Tech. (IT) - 9.01 CGPA

National Institute of Science & Technology

📅 August 2018 – May 2022

PROJECTS

EMS – Employee Management System 📄

- Built a full-stack Employee Management System using **ASP.NET 6 Web API** and **Angular** to manage employee personal, contact, job, and performance data.

AIRA – Personal AI Assistant 📄

- Developed a **personal AI-based resume chatbot** with conversational intents to provide information about me (Ashish).
- Integrated AI/ML capabilities using **TensorFlow, Keras, NLTK, NumPy, Joblib, scikit-learn, SQLAlchemy, TensorBoard, and TFLearn**.

TECHNICAL SKILLS

- **Frontend:** Angular (v14–v19), TypeScript, JavaScript (ES6+), React, HTML5, CSS3,
- **Backend:** Node.js, Express.js, Python, FastAPI, ASP.NET Core, REST APIs, Flask
- **AI / GenAI:** Azure OpenAI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Model Context Protocol (MCP), Prompt Engineering, Semantic Search, Vector Search, OCR, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy
- **Cloud & DevOps:** Azure, AWS, Google Cloud Platform (GCP), Git, GitHub, CI/CD, Docker
- **Databases:** MongoDB, PostgreSQL, SQL Server, Firebase, Microsoft SQL Server Management Studio (SSMS)
- **Architecture & Concepts:** Microservices, Distributed Systems, RESTful APIs, Micro-Frontend Architecture, System Design, Event-Driven Architecture

ACHIEVEMENTS

- Acquired **Az900 certification**, showcasing expertise in Azure Platform.
- Awarded **1st place** at NCU Codeathon 2021 hackathon.
- Achieved **3rd prize** in the OpenCV competition organized by GirlsScript Foundation.
- Delivered a session on **"Advancement of Python"** at Hack the Mountain International Hackathon.
- GSSOC: Project Admin of **ML ProjectYard** 📄 | 800+ commits | 200+ merged PRs | 70+ contributors
